Training method

This course is highly participative with both theory and practical sessions, highlighted by the use of PowerPoint presentation. A written paper is incorporated in order to prove the delegates, understanding of the relevant information.

As a company providing training to a standard of excellence, we always aim to assist our clients in meeting all relevant Health & Safety legislation. HS(G) 17 quotes regulation 9. The certificate of appointment must specify the classes or description of abrasive wheels that the operative has been appointed to mount. Your company can ensure that your operatives received training for the relevant type of equipment clearly specifying the type of equipment that they will be using. i.e Stihl saw, diamond tipped cutting disc, abrasive cutting disc. Angle grinder using cutting off discs and grinding discs, or pedestal/bench grinder etc.

Additional Information
